The key objective of the programme is to provide a rigorous and up-to-date training in Economics with a special focus on Economic Development. The programme consists of required courses in Economic Theory (two each in both Microeconomics and Macroeconomics), Mathematical Methods in Economics, Statistics, Econometrics and Development Economics. There is also a choice of several elective courses that complement the programme. In addition to the coursework, the programme requires students to engage in a year-long (in the fourth semesters) independent research work leading to their MA dissertation. The programme is meticulously designed so that our students can emerge as well-rounded economists (both analytically and from a policy perspective), who would fit in comfortably, in terms of career choices, in the academia, public, private and international organizations, both within the SAARC region and globally.
